

Why Switch to MentorEase?

Top 10 reasons to move from another mentoring software to MentorEase

MentorEase is an affordable, easy-to-use software to help manage your mentoring programs.

1. Lower Cost

Some of our competitors charge \$20-50k a year for mentoring programs that can end up having as few as 200-300 participants. Our transparent upfront pricing means first year charges are as little as \$6,995 and subsequent years from as low as \$3,400 - why pay more?

2. Paying for features you don't actually need or use

MentorEase is installed and customized for each program as needed. We work with you to define which features you need and only install those to minimize cost and ease of use by your participants and admin staff.

3. Some mentoring software is more akin to LinkedIn

Broader based mentoring software platforms can have thousands of potentially dormant accounts, or mentees contacting mentors with no real purpose or context. MentorEase has a clear process for participants to go through from finding a mentor to a customized curriculum of activities to ensure success and accountability.

4. MentorEase is designed to scale

We can add in new programs easily with no or little added costs. MentorEase also supports different types of programs:

- * Higher Education: alumni to student, new alumni to older alumni, peer to peer / buddy programs, high school students to existing students to support enrollment, and even staff mentoring.
- * Corporate programs: intern mentoring, new staff mentoring, succession planning and DEI.
- * Associations & Non-Profits: new member mentoring, startup mentoring and newcomer mentoring.

5. No long term contracts.

After the first year we don't tie you to us for extra years. Some of our competitors require a three year commitment. We believe the success of your programs means we don't need to tie you down..

6. Easy to migrate to MentorEase

We can import data of existing mentors, mentees and matches over to us easily and with no fuss.

7. Not a cookie cutter approach

Every mentoring site has custom forms and algorithms alongside a custom landing page and activities.

8. Our senior team is deeply involved from day one

We don't immediately pass you off to a Customer Success Manager or Account Manager - you always have the senior team available to help with any questions or answers. We are vested in your success to help your mentoring program thrive and grow for the short and long term.

9. We can provide case studies and references

MentorEase has many satisfied clients across many types of organizations, industries and mentoring programs.

10. Effective reporting

We ensure internal stakeholders can see the return on investment of your mentoring programs.
